

GUARANTEED ANALYSIS

17%.....Blend of non-ionic surfactant
83%.....Inert Ingredients

GENERAL INFORMATION

Dispatch is a novel patented technology specifically formulated for injection through irrigation systems to maximize irrigation results. *Dispatch* maximizes irrigation efficiency and distribution uniformity, providing 40%-50% water and energy savings. Because of *Dispatch's* superior penetrant performance, you can expect higher irrigation efficiency and a decrease in water lost to evaporation and runoff.

BENEFITS

- 40% - 50% water and energy savings
- Maintains turf color and quality at half the water usage rate
- Rapid penetration moves water off surface to reduce runoff & evaporation
- Increases nitrogen retention in the rootzone
- Alleviates summer decline issues
- Enhances water, pesticide and nutrient penetration through thatch
- Backed by a money-back performance guarantee

APPLICATION OPPORTUNITIES

Golf Course Superintendents, Sports Turf Managers, Lawncare Operators and Landscape Contractors

Apply bi-weekly or monthly at rates ranging from 12 - 48 fluid ounces per acre depending on turf needs.

GENERAL INFORMATION

DISPATCH improves the infiltration and penetration of applied irrigation water. This formulation can be applied to all fine turf species. DISPATCH may be applied through irrigation systems or by conventional spray rig equipment.

DIRECTIONS FOR USE

TURF

Injection

Monthly program: Inject 1.5 pts (24 fl oz) per acre (1.8 L per hectare). Apply monthly or as needed throughout the growing season. For more difficult areas, DISPATCH may be applied at up to 3 pts (48 fl oz) per acre (3.6 L per hectare).

Optional/Flexible Program: Inject 0.75 pt (12 fl oz) per acre (0.9 L per hectare). Apply every two weeks or as needed throughout the growing season.

Difficult Areas: Inject 1.5-3 pts (24-48 fl oz) per acre (1.8-3.6 L per hectare) applied per month or as needed.

Conventional Sprayers

Apply DISPATCH at 3/4 fl oz/1000 sq ft in at least 1 gal of water (24 mL/4 L water/100 m²). Follow normal irrigation schedule. Apply monthly or as needed throughout the growing season. DISPATCH DOES NOT NEED TO BE WATERED-IN FOLLOWING APPLICATION. Irrigate before next mowing or leave baskets off.

Tank Mixing

Tank mix DISPATCH at 24 fl oz/100 gal of spray solution (190 mL per 100 L of spray solution). DISPATCH is compatible with most chemicals. Prior to application, evaluate the tank mix for compatibility and apply to a small area to determine the effect on turf quality.

STORAGE AND DISPOSAL

Keep container tightly closed. Store in original container only. Keep in a secure and locked storage area. Do not add water to the contents of this container.

Triple rinse container, empty rinse water into spray or stock tank. Dispose of empty containers in accordance with federal, state, and local law.

PLEASE NOTE: This is a specimen label.

For more detailed usage information please see full product label or call 800-257-7797.
