### **ATHLETIC FIELD – BERMUDA**

**NOTE:** All good turf programs begin in the Fall of the year.

**September 1** – Overseed Bermuda with 300 lb per acre of a good blend like Trifecta Ryegrass. Apply one of our STP custom blends of starter fert. Like 10-18-22 or something similar.

**November 15** – When Bermuda has gone dormant, apply Par Ex 24-4-12 at 200 lbs per acre. This will provide adequate late Fall and early Spring fertilizer for the overseeded Ryegrasses.

**April 1** – Apply RegalStar II at 200 lbs per acre as a fertilizer and season long Crabgrass/Goosegrass control.

**June 15** – Apply STP Custom 20-10-10 with 45% A.S. and 55% A.T. at 250 lbs per acre.

**August 1** – Repeat STP Custom 20-10-10 (same rate).

(All dates are approximate)

**Broadleaf Weed Control** – Spray as needed in Spring or Fall with one of our liquid products.
