IS FAIRY RING A PROBLEM?

For the past several years I have observed some of the best Fairy Ring control I have ever seen.

My good friend, Bob Kline, former superintendent at two courses in Poplar Bluff, Missouri, used a product called Turf Formula for Fairy Ring.

Since then I have had several other superintendents try this product. Bob had great results compared to the Fairy Ring problem that he had in the past and so have several other Superintendents.

Turf Formula is a liquid organic, combined with Sea Plant. I have been extremely impressed with the results.

HERE'S THE PROGRAM; IT'S SIMPLE.

Begin in April and apply monthly throughout September. The **rate is 4 oz per** thousand sq ft or **approximately 1-1/2 gal per acre**.

Turf Formula is very compatible with any normal pesticide applications. Bob said that occasionally the dark green ring would appear but it doesn't kill the grass as happens so many times. If the ring appears, and then simply apply Prostar at the Fairy Ring rate and it should disappear.

Again, this has been a very good product and very affordable. Turf Formula will cost you very little per acre per month and we believe you will see good results.

Organic fertilizers containing Amm. Sulfate have also shown to be of help. The product of choice here is **Replenish 10-2-5** with nearly 50% A.S. Use rate is 5 to 10 lbs. per 1000 on a monthly basis.
