If the field is predominantly Turf Fescue, you could possibly eliminate the Pythium fungicide, Subdue G, and reduce your cost by \$654.00 per acre.

If the field is predominantly Bluegrass/Ryegrass, then add two more fungicide applications for dollar spot. One in May and one in September. Use Bayleton Granular for these applications. This would add \$210.00 per acre.

1-3/4 Acre Football Field - \$4,000.00 per year approximately

2-1/2 Acre Soccer Park Field - \$5,700.00 per year approximately
